

Ghassen Azouz

QA Automation Engineer – Playwright · BDD · CI/CD

✉ azouz.ghassen96@outlook.fr ☎ [06 63 07 27 11](tel:0663072711) 📍 Paris, France

Profiles [linkedin](#)
[ghassen-azzouz96](#)

Summary QA Automation Engineer with 5 years of experience specializing in **Playwright/TypeScript**, **BDD/Cucumber**, and **CI/CD** integration. Proven track record designing test frameworks from scratch and optimizing pipelines in complex environments (retail, banking, real-time systems). ISTQB certified. Available immediately as a freelance consultant.

Experience **PMU** Paris, France
Quality Assurance Engineer, Automation - Freelance January 2026 - May 2026

- **Test Infrastructure and Tools**
 - Maintained the Playwright test infrastructure on a real-time betting system (PMU), ensuring the availability of environments during peak activity (live races)
 - Documented the technical architecture and operational procedures
- **Test-Driven CI/CD**
 - Worked alongside project teams to maintain continuous integration pipelines
 - Optimized Jenkins/GitLab CI pipelines: reduced suite execution time from 90 minutes to 45 minutes through parallelization
 - Implemented test distribution across 4 parallel agents, cutting feedback time in half
 - Configured reporting and result notification mechanisms
 - Co-managed the versioning and deployment of test frameworks with the tech lead (CD)
- **Steering and Observability**
 - Generated metrics for operational tracking of PI tickets.
 - Participated in steering meetings (PI Planning, Inspect & Adapt in our SAFe context)
- **Support and Guidance**
 - Guided QA teams in using the tools
 - Resolved incidents related to the test infrastructure
 - Trained two QA teams in CI/CD practices (versioning, test integration, alerting) within a multi-team SAFe context

Carrefour Massy, France
Quality Assurance Engineer, Automation January 2024 - December 2025

- **Test Strategy and Design**
 - Define and implement an automated testing strategy using a BDD approach, in alignment with the acceptance criteria of user stories
 - Analyze functional specifications and design Gherkin scenarios documented in Jira Xray

- Structure test cases according to best practices (Page Object Model, reusability, robustness)
- **Automation and Tools**
 - Developed and maintained automated UI tests using Selenium WebDriver and Cucumber
 - Automated API tests using Karate to ensure the consistency of back-end services
 - Designed and executed performance tests using Gatling; analyzed and optimized application response times
- **CI/CD and Integration**
 - Integrated test suites into Jenkins pipelines for continuous execution and automated reporting of results
- **Management and Collaboration**
 - Tracked defects and generated quality reports via Jira Xray
 - Led test reviews and participated in Scrum ceremonies
 - Contributed to the continuous improvement of automated coverage and testing processes

Axe Finance

Quality Assurance Engineer, Automation

Tunis, Tunisie
June 2021 - December 2023

- **Strategy and Planning**
 - Analyzed banking system specifications to identify requirements and modeled functional flows
 - Developed detailed test strategies and plans in collaboration with the QA team
- **Infrastructure and Test Environments**
 - Configured and maintained test environments, ensuring their stability and availability
 - Maintained the datasets, mocks, and stubs necessary for test execution
- **Automation and Execution**
 - Designed, maintained, and executed functional and automated test cases
 - Automated repetitive scenarios to optimize efficiency and test coverage
 - Performed post-deployment non-regression testing (new features and patches)
- **Quality and Reporting**
 - Analyzed results, qualified defects, and provided reproducible and actionable bug reports
 - Documented tests, results, and defects in a structured manner
 - Collaborated with development teams to ensure quality throughout the SDLC
